RULES ON SECOND PAGE!!

WORLD PANDEMIC – COVID-19 BINGO GAME

This game is meant to be a fun and creative way to show how Covid-19 is still affecting people in December of 2020, almost a year since the outbreak. Strict rules and regulations are still in place and many people consider this to be the “new normal” I wanted to create a game where people could interact and see how their life has changed

The rules follow as

- 1) You need 5 spaces covered up to win either horizontal, vertical or diagonal.
- 2) You can only cover up a space if that particular event happened to you
- 3) The thing that makes this game unique is, if you cover a square you have to tell how that event has changed over the course of the year as well as what you like the most and dislike about that square due to Covid. This can really get people to interact with how Covid-19 have changed their routine.
