

Covid 19 my story

It is difficult to work in a pandemic

Fast food and grocery are two of the places I work

The only way I am surviving this pandemic is my co workers teamwork

To be safe we enforce the guidelines

One is people staying 6 feet apart in lines

Employees and customers are separated by a shield

Some people lean around the barriers, sometimes I wish in the shield I was sealed

Gloves are required

In both companies people are being hired

Sanitization is not just about getting rid of the virus on the surface

It is mostly about keeping the customer from getting nervous

Customers that come in without a mask

Because of the fear of violence to put one on is something we cannot ask

I have learned that

Because of COVID I don't feel safe where I work at

Threatened by a virus, and the people who are not taking the precautions they are supposed to

Its so sad to see that they believe that this pandemic is not true

Pulling the mask down to talk to me
Because according to them they don't have covid, they are carefree

The fear I get of infecting my family is astronomical, but I have no choice
I just feel like however hard I try, I don't have a voice
