

Life was amazing and the streets were busy all night
I would go out with friends or whoever was in sight
Then the invisible virus came and brought fear
We were told in 15 days it would be all clear

Everyone had to come together to stop the disaster
If we do, it will be over much faster
Some days it felt like I was stuck in a jail
It was then that I grew closer to my family, and we would prevail

After a while we were finally able to go out
I wanted to see what this was all about
People wore gloves and masks
Just to go and do their daily tasks

Finally, they rushed out with a cure
We now can go out without being so obscure
Life is getting better; it seems the madness has slowed
I am beginning to see a light at the end of the road
